DESCRIPTORS: *Light, *Polarization, *Carbon black,
*Particles, Reflection, Scattering.

The state of polarization of light entering into the
thinner medium upon total reflection is examined by
means of scattering particles. The results are in
agreement with theoretical expectations. The calcu-
lated value is obtained in particular for the ratio of the
longitudinal component to the component which is
perpendicular to the boundary plane. Carbon black
particles are used as scattering particles. A separate
